

# Login for OECD's Paper on Tax in the Digitalised Age

*- Know what has been consulted on and hear what has been said*

## Programme Synopsis

There was much buzz within the profession on the Organisation for Economic Co-Operation and Development (OECD)'s [recent public consultation](#) on the possible solutions to the tax challenges of digitalisation.

The public consultation covered areas such as profit determination, profit allocation, administration, the various possible rules to manage global anti-base erosion and much more.

In this special *Tax Excellence Decoded* session, hear from **PwC Singapore's Lead for Transfer Pricing and Value Chain Transformations, Tax Partner Mr Andrew Fairfoull**, as he explores what was stated (*and not stated!*) in the OECD's consultation paper, explains the various proposals covered and the key considerations.

With Andrew's extensive experience in value chain transformations, the session aims to also bring participants to the crux of what the practical reality is, and the corresponding issues businesses need to be mindful of as the gears of business move steadfastly ahead on digitalisation.

## Programme Outline

- Know what was covered in the OECD's consultation paper 'Addressing the Tax Challenges of the Digitalisation of the Economy'
- Understand the various proposals suggested in the paper and the practical implications to businesses
- Be aware of the suggested rules and mechanism put in place to manage global anti-base erosion
- Discern what some of the responses have been on the consultation paper

## About the Facilitator

### Mr Andrew Fairfoull

Tax Partner & Lead for  
Transfer Pricing and Value Chain Transformation  
PwC Singapore

Andrew Fairfoull is a tax partner and leads the PwC Transfer Pricing and Value Chain Transformation practice in Singapore. He joined the firm in London in 1992 and became a partner in 2003. During his career he has lived and worked in London, Hong Kong, Johannesburg and, since 2015, Singapore.

Throughout his career, Andrew has worked with top-tier multinational companies across multiple sectors, helping them structure their international operations, transfer pricing and holding arrangements. He has a special interest in large-scale integrated global structuring projects. In his previous role he was the global leader of the firm's Value Chain Transformation practice – an international network of tax specialists who work hand in hand with management consultants to design and implement tax-optimised business operating models.

Andrew graduated from the University of Warwick, United Kingdom, with an LLB (Hons) First Class in 1991 and qualified as a UK Chartered Tax Adviser (ATII) in 1994.
